

Website Project Proposal

Prepared for: Gloriosia Gardens
Web Development – WEDE5020

Ariana Gill Lyall

Student Number: ST10527831

Group: 1

Organisation Overview

Gloriosia Gardens is a garden maintenance and garden design business, offering lawn care, planting, seasonal upkeep, and full garden redesigns to residential clients.

Mission

To help clients enjoy healthier, more beautiful outdoor spaces through reliable maintenance and thoughtful, personalised garden design.

Vision

To become the most trusted garden care and design service in the local area, known for quality work and lasting client relationships.

Target Audience

- Homeowners wanting regular garden maintenance
- Homeowners planning a garden redesign or renovation
- Small businesses or estates needing ongoing grounds care

2. Website Goals and Objectives

The website's primary goal is to generate new client enquiries and showcase Gloriosia Gardens' completed work, replacing the current reliance on word-of-mouth referrals.

Key Performance Indicators (KPIs)

- Number of enquiry form submissions per month
- Website visitor traffic (monthly unique visitors)
- Click-through rate on the "Get a Quote" call-to-action
- Portfolio/gallery page views

3. Current Website Analysis

Gloriosia Gardens does not currently have a website and relies on a Facebook page for visibility.

Strengths

- Existing Facebook page has genuine client reviews and photos

Weaknesses

- No dedicated website means the business is hard to find via search engines
- No structured way for visitors to request a quote
- No central place to showcase a full portfolio of past projects

4. Proposed Website Features and Functionality

- Homepage – introduction, logo image, and clear call-to-action
- About Us – business history, mission, and team
- Services – garden maintenance and garden design packages
- Contact/– simple enquiry form with service selection

5. Design and User Experience

- Colour Scheme: Earthy greens and browns with a garden theme as a background, reflecting a natural, garden-inspired palette
- Typography: A clean Palatino Linotype for headings paired with a readable Baskerville Old Face for the rest, keeping a friendly, approachable hierarchy
- Layout and Design: Simple, image-led layout with generous white space so photography of gardens remains the focus

6. Technical Requirements

- Hosting: Shared web hosting suitable for a small business site
- Domain name: A .co.za (or relevant local) domain matching the business name

- Languages/Frameworks: HTML, CSS, and JavaScript, with a lightweight CMS (e.g. WordPress) to allow the client to update photos and content

7. Timeline and Milestones

Milestone	Target Week
Proposal & research	Week 1
Wireframes & design	Week 2–3
Development (HTML/CSS/JS)	Week 4–6
Testing & content upload	Week 7
Launch	Week 8

8. Budget

- Domain name registration: approx. R150–R250 per year
- Shared hosting: approx. R100–R200 per month
- Website design & development: approx. R5,000–R8,000 (once-off, student/freelance rate)
- Ongoing maintenance & updates: approx. R300–R500 per month
